

Autodesk Subscription
Use of Previous Version* – Eligible Product List**

Effective April 7, 2008

Requests for Previous Version licenses are available only for the products listed in this document.

Product versions not listed are ineligible primarily due to contractual obligations to third party contributors of intellectual property in the version. In these cases, Autodesk may no longer be legally permitted to issue new licenses for the product version.

If you have legally licensed a Previous Version of Autodesk Software that is NOT listed here, requests for additional previous version license(s) are not available. However, you may request additional activation authorization codes, as needed, for the licenses you originally purchased.

You may continue to use the Previous Version you have legally owned on the following conditions:

- the current version must be on Subscription
- you may not use more seats than you originally owned for any products not appearing on the Eligible Product List.

**Please refer to your Subscription terms and conditions for complete information on the use of Previous Versions of the current release of Autodesk software products.*

***The following Eligible Product List applies if the listed Current Product Version has been released in your country or language.*

Note: not all products are available in all languages or regions. This Eligible Product List is subject to change.
